

"Kartograph.py":

A powerful Python library for generating beautiful, Illustrator friendly SVG Maps.

- * Renders Vectors maps from shapefiles and PostGIS
- * Compact SVG's using Visvalingam simplification
- * Stores metadata in data attributes.
- * Built on top of "GDAL/OGR" and "Shapely".
- * License under AGPL

"Kartograph.js"

A javascript library for creating interactive maps based on Kartograph.js SVG maps.

- * Easy to use: create an interactive map within minutes.
- * Run 100% stand-alone. No server needed.
- * Gracefully degrades to Internet Explorer 7+
- * Built on top of Rapheal and jquery.
- * Licenses under LGPL.
